Reorganisation of the vaccination Department

From

The Sanitary Commissioner

No. 4439 Dated 16.4.14 Received 18.4.14

Diary No. 5993	Enclos. / Spare Copies.	Serial No. /

BRIEF ABSTRACT OF LETTER.

Submits proposals in the matter of the reorganisation of the vaccination establishment in the State.

NOTES AND ORDERS.

In the Health scheme order, dated the 10th August 1907 the Sanitary Commr proposed to reduce the existing number of vaccinators from 95 getting Rs 10, 12 and 15 to 33 getting Rs 20, 30 and 40 according to grades, plus a horse allowance of Rs 10/- was sanctioned. This was not given effect to.

NOTES—First Sheet.

5993

General and Revenue Secretariats.

Gen. File No. 96 of 1913-14

2

Serial No.

Upon on the recommendation of the Sanitary Commissioner, sanction was accorded in July 1910 to the employment of two Sub-Assistant Surgeons as public vaccinators, as an experiment to increase, in the place of non-vaccinators existing amongst the ordinary vaccinators (vide Govt. proc. No. 347-9 dated the 14 July 1910) This arrangement has not been given effect owing to scarcity of medical men.

2. The Sanitary Commr. in his letter No. 2136 dated the 5th December 1913 (reference to in the letter under disposal) requests sanction to restore the number of first, second & third class vaccinators to the original scale. The question is pending orders.

3. The Sanitary Commissioner proposes to replace the existing vaccinators, viz, 94 by duly qualified men trained in the vaccine Institute & not to grant them increased pay of Rs. 15, 12 & 10 respectively. The pay of 1st, 2nd & 3rd class vaccinators, according to the present scale is Rs 15, 12 & 10 respectively. The number in each grade is not known.

If approved the Sanitary Commr will be requested to submit a provision statement.

Submitted for orders.

Serial No.

If the revised scale of pay of vaccinators is sanctioned the net increase will be Rs 5845/- per annum.

The Sanitary Commr proposes to train all the 94 candidates to be employed as vaccinators, in the Vaccine Institute, Bangalore. The cost of training is estimated to be Rs 1000/- in all.

As the proposal involves an extra expenditure Br II has to be consulted.

5·7

not be obtained

19 And under the circumstances, the best course appears to be to be suggested by the San Commissioner of training persons in the Vaccine Institute, persons who have some general education. ~~as in Bombay~~ The standard of general education is taken as the one prescribed in G.O. about the Revenue Vaccinators

20 This method of recruitment may give a better type of Vaccinators, though it may not be what was contemplated by the Sanitary Commissioner

It is also a point for consideration whether the Vaccinators who are already in service, and who form a pretty large number should not be provided for elsewhere, especially as ~~all~~ them and having fairly high salaries ~~and~~ cannot be appointed as peons or Constables

22 It is also necessary to know whether any of the present Vaccinators could fulfil the requirements ~~of the~~ about ~~the~~ general Education &c, & could be given a training along with the new recruits. The hardship of removing the whole number may then be minimised

Submitted;

Rs 2/8.

23 The scheme of appointing Sub Asst Surgeons as Vaccinators is not feasible under present conditions as such appointments will not attract them unless special emoluments are given. Besides that the supply of Sub Asst Surgeons for Indian medical work is not equal to the demand.

24 There is also some danger in keeping the present set of ill-trained and somewhat inadequately paid men. It is therefore necessary to increase the scale of pay now allowed

25 As regards the pay of the lowest class of vaccinators there is no doubt that the minimum here is not much lower than in Bombay or Madras but as the scales of pay prevailing there are more favourable as regard promotion it is necessary to introduce

NOTE—Contn. sheet.

GPB—10,000—13-6-14

General and Revenue Secretariat.

Gen. File No. 96 of 1913-14

Serial No.

a scheme which will do away with stagnation and also at the same time assure to them a reasonable maximum. The scales proposed by the Sanitary Commissioner satisfy these conditions

24 I am not in favour of three classes however I would propose 4 classes

1st class	10	(20 - 1/2 - 25
2nd class	25	(15 - 1/2 - 20)
3rd class	40	(12 - 1 - 15)
4th class	10	10
Reserve Vaccinators	8	10

27) Until a man has acquired sufficient experience he should not be promoted to the 3rd class and a few appointments on Rs 10 will afford some scope for training Vaccinators efficiently.

28 Before a person can be selected as a Vaccinator he should be required to possess a fair standard of educational qualifications I think no

NOTE—Contn. sheet.

GPB—10,000—13-6-14

General and Revenue Secretariat.

Jan File No. 96 of 1913-14

Serial No.

one who has not passed the Lower Secondary Exam[n] in Kannada at least should hereafter be selected as a Vaccinator. The period of two months training prescribed in the order of the 21st June 1913 of the Vaccine Institute is in my opinion quite insufficient to enable ~~them~~ any one to be thoroughly trained in such work I would extend the course at least to three months when they should be made to learn thoroughly not only the entire process of manufacture of the lymph modes of preserving determination the use of the needle & its proper sterilization but also taught some general knowledge with reference to ~~small-pox~~ Specially to small-pox and other eruptive disorders and a few rudimentary ideas of anatomy and physiology.

29 After finishing their course at the Institute they should be made to work

NOTE.—Contn. sheet.

GPB—10,000—13-6-14

Gen File No. 96 of 1913-14

Serial No.

for about 6 months in same District Head-Quarters under a Sanitary Officer, so that when they are posted to a Taluka they may be depended upon to do their work without supervision

30 Promotions according to the new scale will not be given to the men already entertained unless they are qualified and men already in service may be allowed to qualify themselves if competent

31 In sanctioning a revision I beg it seems to me that the question whether for purposes of administrative control the vaccinators may not be placed under the Mamlatdar deserves to be reconsidered. Even now there is much prejudice against vaccination in the Deccan

NOTE—Contn. sheet.

GPB—10,000—13-6-14

and the vaccinators have much difficulty in persuading people to bring their children for vaccination for all professional purposes the Vaccinators may be under the Sanitary Officers but as regard the ordinary details of their work such as the villages they should visit the number of days they should vaccinate each week &c &c the Municipality is in a better position to guide ~~them~~ and control them than the Health Officer

32 To sum up my proposals are (1) the pay of the lowest class may remain at Rs 10

(2) ~~That~~ Those but persons who have passed the Lower Secondary Examn in Vaccination should be appointed Vaccinators

(3) ~~That~~ Every person appointed should undergo a course of training for 3 months at the Vaccine Institute in the manufacture and use of the

General and Revenue Secretariat. | File No. 96 of 1913-14

Serial No.

hygiene and a few rudimentary ideas on hygiene

(4) ~~the~~ After finishing the course in the Vaccine Institute a Vaccinator before being posted as an independent charge should work in a St Headquarters under the Sanitary Officer

(5) As regard administrative control the Vaccinators will be under the Mistry who in all personnel matters will accept the opinion of the St Sanitary Officer

(6) The benefit of the revised scale will be given to Vaccinators who are already in service only if they are fully qualified and have undergone training

33 It is doubtful whether having mounted vaccinators will enable us to reduce the number of men. Any reduction which may be possible will be more than counter balanced by

38 Financially there are two points to be considered

(1) Whether it is possible to support the proposal to add about Rs.6,000/- per annum to permanent recurring expenditure, and

(2) Whether there is need for revising the present rates of pay of Vaccinators.

2. As regards (1) it has to be stated that there is no margin whatever for meeting additional recurring expenditure on establishments. When the triennial forecast was sanctioned in June 1913 it was expected that there would be a deficit of 5 lakhs in the ordinary account and a surplus of 19 lakhs in the account of advertitious revenue and expenditure. In the triennium ending with 1916-17 the position as far as it can be forecast now, is not one of a surplus of 14 lakhs on the whole but of a deficit of from 5 to $8\frac{1}{2}$ lakhs. The situation does not therefore admit of any additional expenditure.

As regards (2) it is not clear why increased rates of pay are proposed. What is wanted is the replacement of the present staff by men with some general qualifications and with training in the work of vaccination. It is stated that men who have passed the Lower Secondary Examination in Kanada will

do

NOTE—Contn. sheet.

General and Revenue Secretariat.

Gen—File No. 96 of 1913-14

Serial No.

do for the work after receiving training in Vaccination work for a few months in the Vaccine Institute. It is not at all clear if the existing rates of pay, namely Rs. 10, 12, 12-1-15, and Rs. 15/- are insufficient for men with these qualifications. These rates of pay do not compare unfavorably with those paid to men with similar qualifications in the Education Department. The evil to be removed is the unsatisfactory recruitment in force hitherto. If the existing unqualified vaccinators could be employed in other Departments it will apparently be possible to replace them by qualified men without raising the existing rates of pay. The case for increasing the present scale of pay cannot therefore be taken to have been made out.

The Palace,

Bangalore,

12th Sept. 1914.

Dear Mr. D'Souza,

The Senior Surgeon in his letter No.4459 dated 16th April 1914 states that

1. that on administrative grounds it is open to objection to make vaccination part of the regular duties of the Sanitary and Assistant Sanitary Inspectors

2. that it is better to replace the existing vaccinators by men who possess a reasonable amount of general education and have had some practical training in the Vaccine Institute. To do this, the existing Vaccinators should find places in the lower grades of service in the Revenue, Police, Excise or Forest Departments,

and recommends

3. travelling allowances to Vaccinators for their itinera-tion.

I shall be obliged if you will kindly let me know what the administrative grounds referred to

in para 1 are, whether it¢ is practicable to carry out prepo-
sal 2 and what your suggestions are in regard to point 3.

The file under reference is return
-ed herewith

Yours Sincerely,
M. Singamma

Public Offices
14.9.14

Dear Mr Sanjeeva Rao

With reference to your D.O letter of the 12th inst requesting some information in connection with the revision of the vaccination dept I have noted below the information required by you

1 What is the objection
on administrative grounds
to make vaccination part
of the regular duties of the
Sanitary and Asst Sanitary
Inspectors

Under the sanitary
system these officials are
expected to attend to
Local Fund and Municipal

works for which there is
no separate agency &
inspect villages & see that
the sanitary rules are
enforced They will
therefore have no time
to attend to vaccinatio

2 As regards the question
that the existing vaccinators
may be absorbed in the
New Police Excise &
Forest Depts they are
generally not qualified
to hold any of those

appointments. The pay of the lowest grade at present is Rs 10 & they cannot be employed as menials It may be possible to take a fairly large number as Engine Work Inspectors (Head Workers &c in the first place

3 There is a proposal pending for granting them travelling allowance at the rate of 3 as a day but this has been kept by till the Question of the

vaccination & vaccinators
is settled & they are
expected to visit about
30 villages a month it
seems desirable to give
them some allowance &
either a horse allowance
& R 8 p.m. may be given
or a daily allowance &
annas three &

Yours sincerely
Patrick Duncan

T.V. Arumugam Mudaliar Esq.,
Sanitary Commissioner with the
Government of His Highness the
Maharaja of Mysore, Bangalore.

To

K.R. Srinivasa Iyengar Esq., M.A.,
Secretary to the Government of His
Highness the Maharaja of Mysore,
General & Revenue Departments,
Bangalore

Sir,

With reference to the correspondence ending with this office letter No. 2136 dated the 5th December 1913, I have the honor to state that the proposed scheme for the gradual replacement of the existing Vaccinators by qualified Medical Subordinates would be ideal provided it were possible to spare men for this work from the cadre of the Medical Department. In my un-official memo No. 15 dated the 11th February 1914 I stated that a few men may become available at the end of this year for appointment as Public Vaccinators. Even should one or two men be appointed immediately I am far from being hopeful of much perceptible increase in the efficiency of the vaccination Department as a whole, - except in so far as we might have the satisfaction of feeling that the small fraction of work done by these subordinates is done with due regard to aseptic precautions. The area that has to be covered by a public Vaccinator moreover, is too vast to admit of a large number of vaccinations being performed every month. In view of these facts it seems to me to be necessary to

191

Enclosure No.

Submitting proposals for the re-organisation of the Vaccination Department.

GPB—60,000—26-9-12

to think of other means whereby while seeking to improve efficiency the existing conditions are not perpetuated for an indefinitely long period. From the accompanying statement it will be seen that if the Vaccinators are to be replaced gradually as vacancies occur, we shall have to wait for at least another 2 decades for a complete re-organisation of the staff. In the meantime, an evil admittedly prejudicial to the interests of the Department has to continue.

2. I have had suggestions recently before me for making vaccination part of the regular duties of Sanitary and Assistant Sanitary Inspectors. At first sight the arrangement certainly looks very desirable and practical but this class of officials is at present so much under-manned that at least as much delay is likely to occur in giving effect to the proposal as that involved in the gradual substitution of Vaccinators by a better type of men On administrative grounds too the arrangement is open to objection.

3. The only course left, under the above circumstances, is to replace all existing Vaccinators at once by men possessing a reasonable amount of general education and a thorough training in the theory and practice of Vaccination at the Local Vaccine Institute. The qualification required of candidates, the period of training and the amount of scholarship payable may be the same as sanctioned, in the case of Reserve Vaccinators, in Government Order No. 10062-3 Sany. 127-11-4 dated the 21st June 1913. A batch of 20 candidates can conveniently be trained in each session of the class, so that in the course of 10 months all the 94 men required will have been trained and employed. There is of course the question as to what to do with the existing men but if the Government will kindly issue orders for

for providing for them in the lower grades of Service in one or other of the Revenue, Police, Excise or Forest Departments, I am sure there would be no need for absolutely dispensing with their services.

4. I would fix the following grades for the new men:

Grade.	Number.	Minimum.	Maximum.
I	10	20 - ½ -	25
II	36	15 - ½ -	20
III	48	12 - 1 -	15

The cost per annum will be a minimum of Rs. 15,792/- and a maximum of Rs. 20,280 as against the present cost of Rs. 15,264/-. To begin with, however, all the 94 Vaccinators will be of the third grade and the initial cost will therefore be only Rs. 13,536/-. Considering the vast improvement in the quality as well as the reliability of the work that would result from the proposed re-organisation, the ultimate excess cost is very moderate.

5. I am informed that in the Madras Presidency Vaccinators are given travelling allowances for their itineration. I recommend that the practice may be introduced in Mysore, the allowances being fixed on the same scale as obtains in Madras.

I have the honor to be,
Sir,
Your most obedient servant,

D.V. Cornaglia

Sanitary Commissioner.

D 624

FROM
Diwan Bahadur,
J. S. CHAKRAVARTI, ESQ., M.A.,
F.R.A.S., etc.,
Comptroller to the Government of
His Highness the Maharaja of Mysore.

To

D. M. Narasinga Rao ESQ., B.A., B.L.,

Offg: *Secretary to the Government of Mysore,*

General and Revenue *Departments.*

SIR,

I have the honor to forward herewith a proposition statement in duplicate received from the Sanitary Commissioner in Mysore for revising the existing scale of pay of Vaccinators and its covering letter No.4914 dated 15th May 1914, and to state that the proposition statement has been duly verified.

2. The proposition is to convert the existing appointments on fixed pay to three grades with progressive rates of pay as under:

	Present.		Proposed.
Firast Grade	8 (15)	...	10(20-1/2-25)
Second ,,	46 (12)	...	36(15-1/2-20)
Third ,,	40 (10)	...	48(12-1-15)
Reserve Vaccinators	8 (12-1-15)	...	8(12-1-15)

3. It may be noted that the existing scale is taken in accordance with the original scale sanctioned in 1889, viz., with 94 men and 8 reserve vaccinators subsequently sanctioned. Effect has not been given yet to Government Order No.347-9/Sany.85-09-6 dated 14th July 1910 sanctioning the appointment of two public vaccinators in place of six ordinary vaccinators whose places were then vacant. As the

Sanitary Commissioner is not in favor of these appointments, these two appointments are not shown on either side of the proposition statement. It will therefore be observed that if the proposition now under consideration is sanctioned, the order of 14th July 1910 referred to above will have to be treated as cancelled.

3. The financial effect of the proposition, if sanctioned, will be an addition of Rs.487$\frac{1}{10}$ per mensem or Rs.5,845$\frac{1}{5}$ per annum to the permanent recurring expenditure of the State.

I have the honor to be,

Sir,

Adverting to your No. 10995 Sany. 96-13-2 dated the 4th May 1913, I have the honor to forward a proposition statement in the matter of the re-organisation of the Vaccination Establishment in the State.

2. As already stated in my letter No 4432 dated the 13th Ultimo, all the 94 candidates required for employment may be trained in about 10 months and the total cost of training is not likely to exceed Rs. 1,000/-.

I have the honor to be,

of the Vaccination Establishment

GPB—50,000—26-9-12

Letter No. 4439 dated the 16th April 1914 from the Sanitary Commissioner in Mysore to the Secretary to the Government of Mysore, General & Revenue Depts.

-----:O:-----

With reference to the correspondence ending with this office letter No. 2136 dated the 5th December 1913, I have the honor to state that the proposed scheme for the gradual replacement of the existing Vaccinators by qualified Medical Subordinates would be ideal provided it were possible to spare men for this work from the cadre of the Medical Department. In my un-official memo No. 15 dated the 11th February 1914 I stated that a few men may become available at the end of this year for appointment as Public Vaccinators. Even should one or two men be appointed immediately I am far from being hopeful of much perceptible increase in the efficiency of the vaccination Department as a whole, - except in so far as we might have the satisfaction of feeling that the small fraction of work done by these subordinates is done with due regard to aseptic precautions. The area that has to be covered by a Public Vaccinator moreover, is too vast to admit of a large number of vaccinations being performed every month. In view of these facts it seems to me to be necessary to think of other means whereby while seeking to improve efficiency the existing conditions are not perpetuated for an indefinitely long period. From the accompanying statement it will be seen that if the Vaccinators are to be replaced gradually as vacancies occur, we shall have to wait for at least another 2 decades for a complete re-organisation of the staff. In the meantime, an evil admittedly prejudicial to the interests of the Department has to continue.

2. I have had suggestions recently before me for making vaccination part of the regular duties of Sanitary

Sanitary and Assistant Sanitary Inspectors. At first sight the arrangement certainly looks very desirable and practical but this class of officials is at present so much undermanned that at least as much delay is likely to occur in giving effect to the proposal as that involved in the gradual substitution of Vaccinators by a better type of men. On administrative grounds too the arrangement is open to objection.

3. The only course left, under the above circumstances is to replace all existing Vaccinators at once by men possessing a reasonable amount of general education and a thorough training in the theory and practice of vaccination at the local Vaccine Institute. The qualification required of candidates, the period of training and the amount of scholarship payable may be the same as sanctioned, in the case of Reserve Vaccinators, in Government Order No. 10062-Sany. 127-11-4 dated the 21st June 1913. A batch of 20 candidates can conveniently be trained in each session of the class, so that in the course of 10 months all the 94 men required will have been trained and employed. There is of course the question as to what to do with the existing men, but if the Government will kindly issue orders for providing for them in the lower grades of Service in one or other of the Revenue, Police, Excise or Forest Departments, I am sure there would be no need for absolutely dispensing with their services.

4. I would fix the following grades for the new men:

Grade.	Number.	Minimum.	Maximum.
I	10	20 - ½ - 25	
II	36	15 - ½ - 20	
III	~~48~~ 48	12 - 1 - 15	

The cost per annum will be a minimum of Rs. 15,792/- and a maximum of Rs 20,280 as against the present cost of Rs. 15,264/-. To begin with, however, all the 94 Vaccinators will be of the third grade and the initial cost will therefore be only Rs. 13,536/-. Considering the vast improvement in the quality as well as the reliability of the work that would result from the proposed re-organisation, the ultimate excess cost is very moderate.

5. I am informed that in the Madras Presidency Vaccinators are given travelling allowances for their itineration. I recommend that the practice may be introduced in Mysore, the allowances being fixed on the same scale as obtains in Madras.

To 7721
Sanit 76-13-5
The Sanitary Commissioner.

Sir,

With reference to your letter No. 4914 dated the 15th May 1914, submitting proposals in the matter of re-organization of the Vaccination Establishment in the State, I am directed to state that owing to financial reasons Government are unable to consider proposals at present involving a permanent increase of expenditure and they have decided to defer the question till January next.

2. I am to add that with a view to improve the staff of the department none but qualified and trained men should be entertained in future. As regards men in service two statements may be kindly prepared one giving the names of men who having been either already trained or being considered fit to be trained, may be

be ~~kept~~ retained in the department and (2) of persons who not being duly qualified require to be replaced, with period of their --- service Arrangements should be made to give a proper training to all men included in the 1st list and proposals submitted in consultation with Deputy Commissioners of Districts regarding the manner in which men who are not fit for the department may be disposed of.

To

D.M. Narasinga Rao Esq., B.A., B.L.,
Secretary to the Government of His
Highness the Maharajah of Mysore,
General & Revenue Departments,
BANGALORE.

SIR,

With reference to your letter No. 7721 Sany. 96-13-5 dated the 6th Instant, I have the honor to request that pending final orders of Government on the subject of the revision of the vaccination establishment sanction may be accorded to my proposal for filling up the existing vacancies in the first and second grades by promoting competent men from out of the next lower grade. This will in no way affect the proposed revision of the Establishment but on the other hand, will go far in allaying the demoralisation that, I fear, has set in consequent on promotions, legitimately due, having had to be witheld for now nearly 8 years.

2. The instructions conveyed in para 2 of your letter are receiving attention.

I have the honor to be,
S i r ,
